## Business Management

### Which feature would you like to work with?

#### Business Closures

Create a list of holidays and other times when the business is closed.

#### Queues

Create and manage service queues, and manage the membership of private queues. Establish criteria for automatic record creation and updates.

#### Sales Territories

Create new sales territories and assign territory managers. Add and remove members, modify territory information, and delete territories.

#### Subjects

Manage the subject hierarchy for your organization's products, literature, and articles.

#### Connection Roles

Create, edit, and delete the standard labels used to define connections between records.

#### Facilities/Equipment

Add facilities and equipment for service scheduling. Change information about resources or delete existing resources.

#### Resource Groups

Add new groups and new members to existing groups for service scheduling. Update group information and delete groups or group members.

#### Services

Add new services for service scheduling. Change service information and deactivate existing services.

#### Currencies

Add new currencies or change the exchange rates for existing currencies.

#### Relationship Roles

Manage the standard labels users can apply when they define relationship roles between homes, customers, and opportunities.

## Templates

### Which feature would you like to work with?

**Email Templates**  
Create and manage templates for email messages.

**Email Signatures**  
Create and manage email signatures.

**Mail Merge Templates**  
Upload and manage Word templates for use with mail merge.

### Families & Products

A product is an item in the product catalog that you want to sell to your customers. In this section, you manage products, set up product family hierarchies, create product bundles, and manage properties of product records. You can publish, revise, or retire product records, and also reclassify them to move them to other areas of the product catalog.

### Discount Lists

A discount list contains the specific discounts that can be applied to a product, based on volume purchased. In this section, you create, manage, and delete discount lists in the product catalog.

### Price Lists

A price list specifies what prices can be charged for each unit in the unit group of a product. In this section, you create, manage, and delete price list line items and price lists in the product catalog. You associate and disassociate products with price lists. You also specify various pricing options in the price list line items, such as the quantity selling option, the pricing method, and the rounding options.

### Unit Groups

A unit group contains the base unit a product is available in, such as a liter, and then lists all the different increments that this base unit is packaged for sale. For example, if the base unit is a two-liter bottle, then that product could be sold individually as a two-liter bottle or in a case containing 6 two-liter bottles. In this section, you create, manage, and delete units and unit groups in the product catalog.

# Unified Service Desk

## Which item would you like to configure?

### Hosted Controls

Create and manage hosted controls. Hosted Controls are the primary elements used for building applications using Unified Service Desk.

### Action Calls

Create and manage action calls for Unified Service Desk. Action calls can be added to toolbar buttons, events, window navigation rules, and agent scripts.

### Entity Searches

Create and manage entity searches. Entity searches query the Microsoft Dynamics 365 web services to return data.

### Session Lines

Create and manage session lines. Session lines define session name and session overview information in Unified Service Desk.

### Scriptlets

Create and manage scriptlets for Unified Service Desk. Scriptlets are snippets of JavaScript that are executed in the context of Unified Service Desk.

### Options

Create and manage options for Unified Service Desk. Options are name value pairs that can be used by components.

### Customization File

Create and manage the compressed (.zip) file that contains the customization files required for custom configuration in Unified Service Desk.

### Audit & Diagnostics Settings

Create and manage Audit & Diagnostics Settings for Unified Service Desk.

### Toolbars

Create and manage toolbars and buttons for Unified Service Desk. Toolbars contain buttons with images and text, and buttons are used to execute actions.

### Events

Create and manage events. Events are notifications that a hosted control triggers to indicate to the application that something is occurring.

### Window Navigation Rules

Create and manage window navigation rules. Window navigation rules define the interaction among various controls in Unified Service Desk.

### Agent Scripts

Create and manage agent script tasks and answers. Agent scripting provides guidance to agents about what they should say on calls and what the next steps are in the process.

### Forms

Create and manage forms that store declarative form definitions.

### User Settings

Create and manage user settings for Unified Service Desk.

### Configuration

Create and manage configurations for Unified Service Desk assets that can be associated with different users.

## Service Management

Set up customer service for your organization.

### Case Settings with Record Creation and Update Rules

 **Queues**  
Create and manage service queues, and manage the membership of private queues. Establish criteria for automatic record creation and updates.

 **Parent and Child case settings**  
Specify the information to be inherited from a parent case to child cases. Define case closure cascade settings between parent and child cases.

 **Subjects**  
Create and manage information in a subject tree. This helps to categorize an organization's cases to identify frequent requests and problem areas.

### Service Terms

 **Holiday Schedule**  
Create and manage a list of holidays for the customer service schedule. Associating the holiday schedule with a service schedule determines SLA time calculations.

 **Customer Service Schedule**  
Create and manage customer service schedules for the organization.

### Knowledge Base Management

 **Categories**  
Create and manage information in a category tree. This helps to categorize an organization's knowledge base so contacts can find information.

### Templates

 **Email Templates**  
Create and manage templates for email messages.

### Service Scheduling

 **Business Closure**  
Create a list of holidays and other times when the business is closed.

 **Services**  
Add new services for service scheduling. Change service information and deactivate existing services.

 **Facilities/Equipment**  
Add facilities and equipment for service scheduling. Change information about resources or delete existing resources.

 **Resource Groups**  
Add new groups and new members to existing groups for service scheduling. Update group information and delete groups or group members.

# Customization

## Which feature would you like to work with?

### Developer Resources

View information or download files that help you develop applications and extensions for Microsoft Dynamics 365.

### Themes

Adjust your organization's colors. Create, change, or delete themes that are used in your organization.

Customization  
Which feature would you like to work with?

Create new security roles. Manage and delete existing security roles for your organization.

#### Access Team Templates

Add new team templates. Modify the team template description.

#### Teams

Add new teams and new members to existing teams. Modify the team description and delete members from teams.

#### Business Units

Add new business units. Edit and deactivate existing business units. Change the parent business unit.

## Data Management

### What would you like to do?

**Duplicate Detection Rules**  
Create, modify and publish duplicate detection rules.

**Bulk Record Deletion**  
Manage bulk record-deletion jobs.

**Imports**  
Import data and view the status of imports in progress.

**Export Field Translations**  
Export translatable text for the localizable fields in the application

**Duplicate Detection Jobs**  
Create and monitor duplicate detection jobs.

**Data Maps**  
Create, import, and export data maps used during import.

**Templates for Data Import**  
Download a template for Data import.

**Import Field Translations**  
Import translated text for the localizable fields in the application.

## Document Management

### Which feature would you like to work with?

---

#### SharePoint Sites

A SharePoint site is a record on a SharePoint server or in a site collection. SharePoint site records map to sites or records on a SharePoint server.

#### SharePoint Document Locations

A document location record maps to document libraries or folders on a SharePoint server. They are defined relative to a SharePoint document library record or a document location record. They can be associated with a Microsoft Dynamics 365 record.

#### OneNote Integration

Set up OneNote Integration for selected entities so that a dedicated OneNote notebook is automatically created for each Dynamics 365 record. Users will be able to easily access a notebook directly on the activity wall in Dynamics 365 or from the record form in Dynamics 365 mobile apps.

# Audit

What would you like to do?

---

## Audit Summary View

View a chronological listing of transactions across records and users.

# Email Configuration

## What would you like to do?

### Email Server Profiles

Set up the email channel by creating an email server profile and adding mailboxes to it.

### Mailboxes

Manage mailboxes of Microsoft Dynamics 365 users and queues. Specify how you want to synchronize email for the mailboxes.

## Field Service

### Which feature would you like to work with?

#### Field Service Settings

Settings controlling functionality related to Field Service

#### Characteristics

Skills, education and certifications of resources.

#### Locations

Territory represents sales regions.

#### Resource Categories

Resource category master used to categorize people and equipment.

#### Resources

Resource that has capacity which can be allocated to work.

#### Priorities

Priorities to be used on bookings. In addition, a color could be specified for each priority type and the color selected will be shown visually on the schedule board.

#### Work Order Sub-Statuses

Specify custom work order sub-statuses, which can be used to specify the current work order status more precisely.

#### Booking Statuses

Allows creation of multiple sub statuses mapped to a booking status option.

#### Warehouses

Warehouses where inventory products are stored and managed

#### Price Lists

Entity that defines pricing levels.

#### Work Order Types

Create different work order types to reflect the different types of work that your company offers. Work Order types are used to control various settings on a work order.

#### Products

Information about products and their pricing information.

#### Service Task Types

Specify the different service task and labor types that your resources perform as part of their work orders.

#### Incident Types

Incident types define the various types of incidents (issues) that a customer could report, on which work orders are based.

#### Resource Pay Types

Pay Types of resources hourly rate to calculate the resource cost

#### Tax Codes

Store tax related information. Each tax code could contain multiple child tax codes, and in that case the tax rate will be determined by the total tax of all children.

#### Agreement Sub-Statuses

Specify custom agreement sub-statuses, which can be used to specify the current agreement status more precisely.

#### RMA Sub-Statuses

Specify custom RMA sub-statuses, which can be used to specify the current RMA status more precisely.
